Anuja Sawant

Machine Learning & Data Science — Python — SQL

+91 8767544746 — anujasawant555@gmail.com — LinkedIn

Professional Summary

Final-year B.Tech Information Technology student with hands-on experience in Python, Machine Learning, SQL, FastAPI, REST APIs, and data analysis. Experienced in developing AI applications, ML workflows, and data-driven solutions. Seeking entry-level opportunities in Machine Learning, Data Science, Data Analytics, or Data Engineering.

Technical Skills

Programming: Python, Java, JavaScript, SQL
ML & Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, EDA
Backend & APIs: FastAPI, REST APIs, Backend Integration
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Databases: MongoDB, MySQL
Tools: Git, GitHub, Streamlit, Android Studio

Experience

Project Intern – AI Domain **Jul 2026 – Sep 2026**
Infosys Springboard

- Developed a Textile Waste Intelligence Platform using Python, FastAPI, React.js, and MongoDB.
- Integrated fabric/defect classification with recommendation and sustainability analysis modules.
- Built REST APIs for AI inference, authentication, multi-image processing, data storage, and dashboard analytics.

Web Development Intern **Jun 2025 – Nov 2025**
InnovateHive Tech Solutions

- Developed responsive web pages using HTML, CSS, JavaScript, and Tailwind CSS.
- Integrated backend APIs and implemented dynamic web application functionality.
- Used Git and GitHub for version control, debugging, testing, and collaborative development.

Projects

SmartStock – Demand Forecasting & Inventory Risk Intelligence

- Built an end-to-end retail demand forecasting system using Python, XGBoost, and lag/rolling-window time-series features.
- Compared rolling baseline, Random Forest, and XGBoost using MAE/RMSE with time-based and walk-forward validation.
- Developed inventory risk, safety stock, reorder-point, and replenishment logic with an interactive Streamlit dashboard.
- **Live Demo:** smartstock-anuja.streamlit.app

Employee Attrition Prediction System

- Developed an ML application using Python and Random Forest to predict employee attrition on the IBM HR Analytics dataset.
- Performed data preprocessing, EDA, feature selection, and model evaluation.
- Built and deployed an interactive Streamlit dashboard for employee attrition prediction.
- **Live Demo:** employee-attrition-prediction-anuja.streamlit.app

Task Tracker Application

- Developed an Android task management application with CRUD functionality.

Education

B.Tech in Information Technology **2023 – 2027**
Pillai College of Engineering, Navi Mumbai **CGPA: 9.37**

Certifications

- Deloitte Australia Technology Job Simulation – Forage, 2026
- Deloitte Australia Data Analyst Job Simulation – Forage, 2026
- Google Cloud Career Launchpad – Generative AI, 2025
- Web Development – Internshala, 2024
- Java Programming – NPTEL, 2024
